Our Sponsor

Linda Siow, Executive

Operating since 1996

Medical concierge provider:

- Clinic & hospitalisation arrangements
- Treatment plans & price estimates
- Travel arrangements & visas
- Standby assistance in Singapore

Patients:

Indonesia, Malaysia, Cambodia, Vietnam, Myanmar & China

Makes more than
1000 appointments every year

Problem

Unable to keep track of
teams' performances

Difficult to determine most
number of referral,
doctors, specialty

Unable to follow up with
patient

Client's records are
duplicated

Views are not
optimised

Ulink Web Application

1

Analytical tools for decision making

(Specific KPI of different teams, Gender and Age, Ranking of referral, doctor, specialty)

2

Timeline function for recommended screenings

3

Optimised views

(reduce duplicates, group by client name)

Project Management Planned Schedule

Project Management

Actual Schedule

Project Management

Task Metric

Formula = No. of tasks completed/ No. of tasks planned

Score (%)	Description
TM <= 50	<ul style="list-style-type: none">Team is behind schedule as there was a gross under-estimation of effort requiredTeam to consider dropping taskRe-estimate tasks for future iterations and decide on critical functionality to focus on in following iterationTeam to consider dropping functionalities
50 < TM <=90	<ul style="list-style-type: none">Team is slightly behind scheduleRe-estimate tasks for future iterations and decide on critical functionality to focus on in following iteration
90 < TM <= 110	<ul style="list-style-type: none">Estimates are generally accurate and on track
110 < TM <= 150	<ul style="list-style-type: none">Team is ahead of scheduleRe-estimate tasks for future iteration
TM > 150	<ul style="list-style-type: none">Team is ahead of schedule as there was an over-estimation of effort requiredRe-estimate tasks for future iterations

Iteration 2

Planned Tasks: 12

Completed Tasks: 11

TM Score: 91.6%

Project Management

Bug Metric

Bug Metric Impact Score

Severity	Description
Low (1 point)	Unimportant. Typo error or small user interface alignment issues.
High (5 point)	The system runs, but some non-critical functionalities are not working.
Critical (10 points)	System is down or un-usable.

Mitigation Plan

Bug Score	Action
Score ≤ 10	Fix during buffer time
$10 < \text{Score} \leq 20$	Use planned debugging time in the iteration
Score > 20	Stop current development immediately and resolve bugs. PM to reschedule the project.

Total score = $1 * (\text{No. of Low Impact}) + 5 * (\text{No. of High Impact}) + 10 * (\text{No. of Critical Impact})$

Iteration 2

Bug Score: 10

After debugging: 5

Action Plan: Debug
during planned
debugging time

Project Management

Risk Management

Risk	Risk Event	Likelihood	Impact	Mitigation
Project Management Risk	Allocation of too much/ little time for development of functions	Medium	High	1) Include buffer days before final submission. Allocate more time to develop complex functions. 2) Update & Review metrics regularly

Project Management

Risk Management

Risk	Risk Event	Likelihood	Impact	Mitigation
Client Risk	Change in client's requirement	Medium	High	Meet and update client weekly to ensure that development is on par with client's requirements

Project Management

Risk Management

Risk	Risk Event	Likelihood	Impact	Mitigation
Human Risk	Team member is not available due to illness or unforeseen circumstances	Medium	Medium	Each member has dual role to take over member who is unavailable

User Testing 1

Ulink Assist Pte Ltd

User: Linda Siow

OCTOBER

28

UT 1 Feedback

Easy to create clients

Easy to navigate

Timeline design is not intuitive

Naming of columns and fields are confusing

UT 1 Feedback

22

- Timeline display is not intuitive, user suggested to change to table format
 - Stick to one color scheme
 - Client prefers to choose which patient to send email to instead of automated sending of email
- Changes to be made

Timeline - Male

18 YEARS

-

LIST OF SCREENINGS

Obesity,Hypertension (High blood pressure),Diabetic microalbuminuria,Hearing loss,kidney disorder

View Patients

40 YEARS

-

LIST OF SCREENINGS

Hyperlipidaemia

View Patients

Midterm

- **5 users using the application**

Final

- **8 users with at least 5 interactions with the system per day**

Learning Outcome

NICOLE

Gain more knowledge on UI development and improve communication skills

SHU YAN

Learn to conduct UAT effectively to collect users feedback, analyse the feedback and devise solution catered to their needs

SEAN

Have a better understanding on how technology can help my client have a better view of their business performance

KAIXIN

Manage team and schedule effectively to deliver product on time

NABILAH

Apply knowledge of design processes and translate business problems into application functions

Thank you
