Iteration 7
27 Dec 2016 - 9 Jan 2016

UPCOMING MEETINGS

Internal 3 January 2016

Client 10 January 2016

Supervisor January 2016

20 Feb 2017

Midterm Presentation

Our PROJECT

Web–based application that identifies the different healthcare milestones for a person over the course of his life. This will help the staffs to determine the appropriate time to follow up with their patients by sending personalised follow–up emails and recommend suitable health screenings to them.

This application will also provide analysis of each team's performance to aid them in decision–making. The analysis of clients' demographics and engagements with Ulink's different stakeholders will also be provided in the application.
